

EPPM SEMINAR

16 -17 NOVEMBER 2009

Department of Energy
Philippines

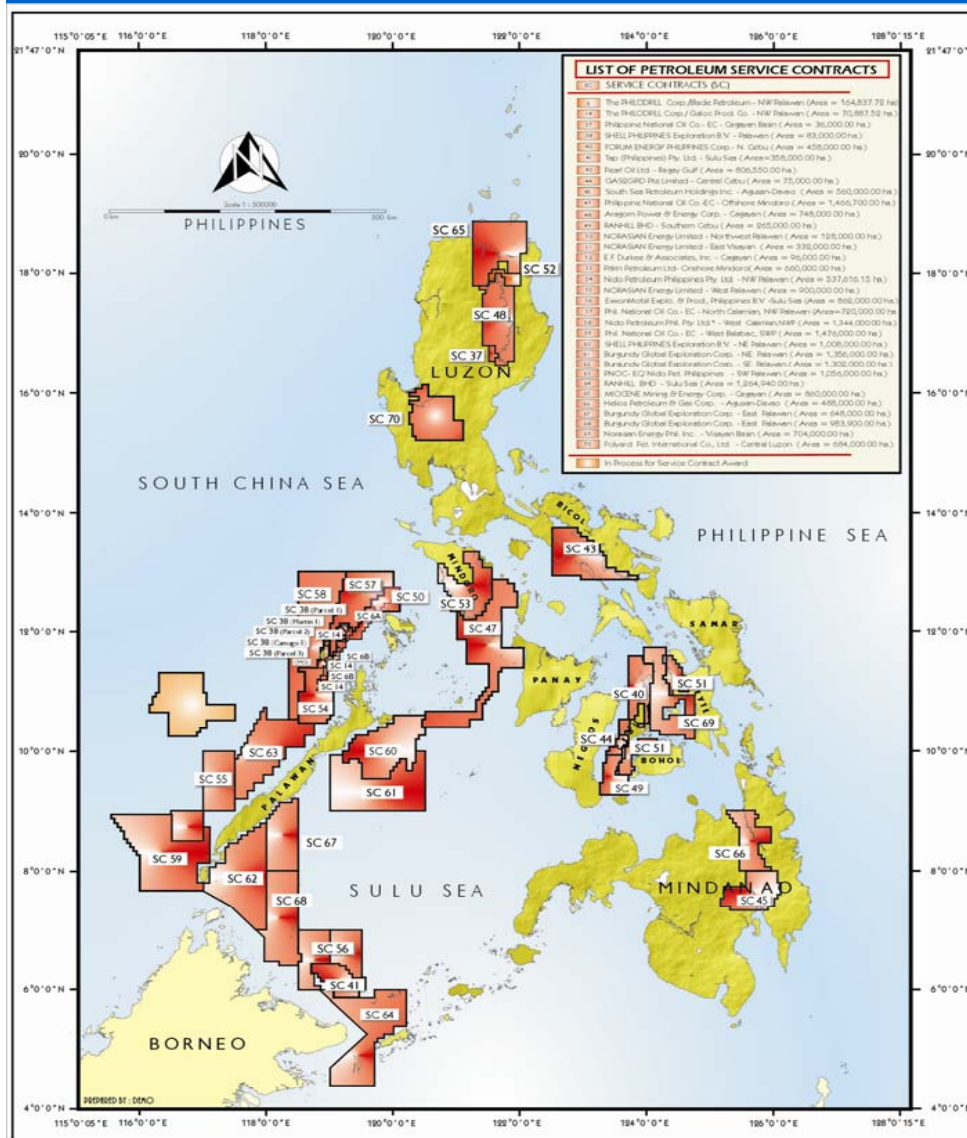

Outline

- Update of Oil and Gas Activities
- Attendance in EPPM Program

Oil and Gas Activities

Existing Petroleum Service Contracts

- 34 Active Service Contracts
- 1 Active Geophysical Survey & Exploration Contract (GSEC) for conversion to SC

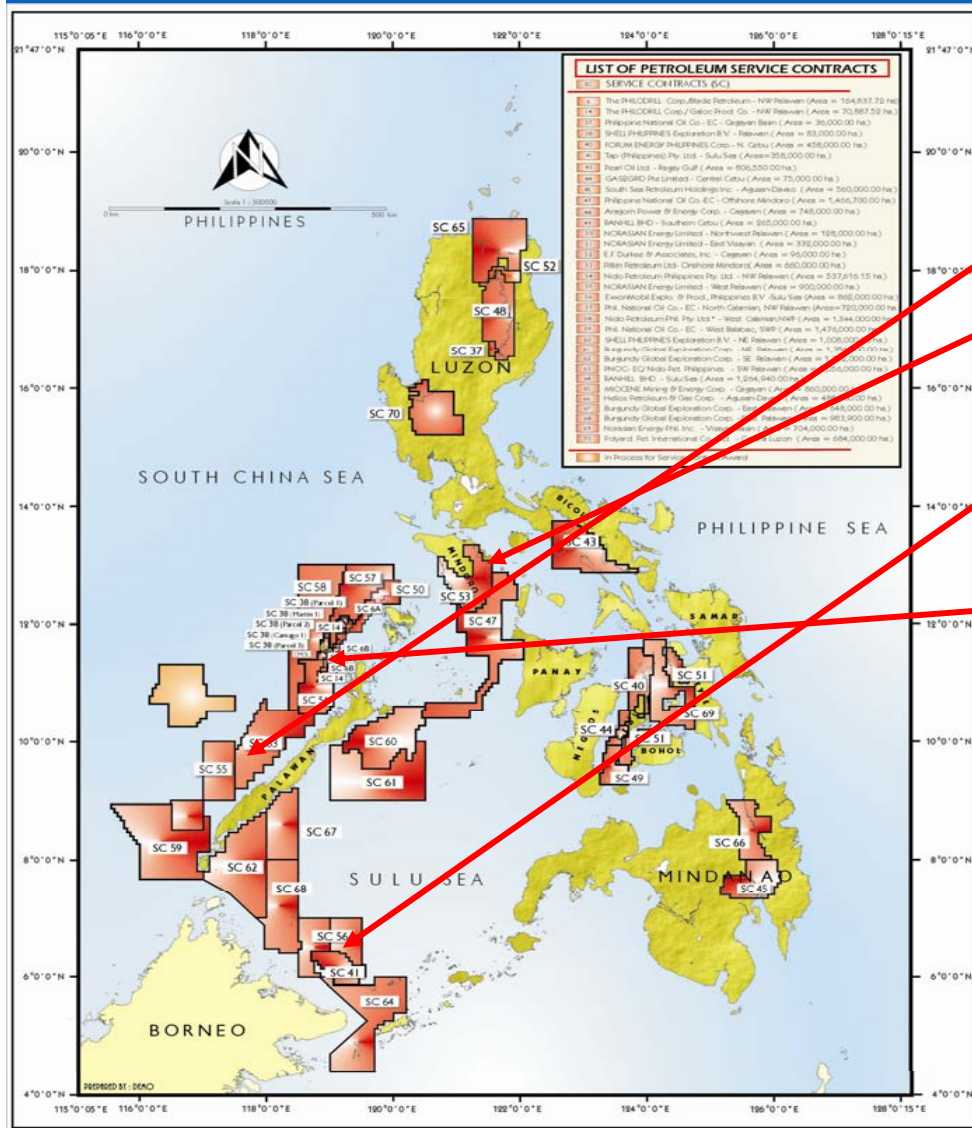

PETROLEUM SERVICE CONTRACT MAP

 PREPARED BY: DEANIEF AYONEDA
 VERIFIED BY: NCO/AN
 DATA SOURCE: PROSD
 LAST UPDATE: 08 October 2016

Oil and Gas Activities

- Production for 1st Semester of CY 2009
 - 1.5 mmbo
 - 65,000 mmcfcg
 - 2.6 mmbc
- Exploration Activities
 - Geologic & Geophysical Surveys
- Contracting Round
 - Preparation of blocks

Attendance in EPPM Program

- Participation in Workshops
 - Bali, Indonesia
 - Krabi, Thailand
 - Chengdu, China
 - Davao, Philippines

Attendance in EPPM Program

- Participation in P2 Workshops
 - the workshop supplied numerous technology and tools for improving capacities for natural gas development of the member countries attendees through the presentations. Also, the workshops conducted facilitated for lessons and technology transfer and sharing among countries which we think is a relevant portion of the workshop that encouraged strengthened relationships among the member countries.

Attendance in EPPM Program

- Participation in P2 Workshops
 - concentrated more on the overview of the geology and development of the field rather than focusing on the technology being used to address the high CO₂ and H₂S issues

Attendance in EPPM Program

- Knowledge Dissemination
 - Knowledge is shared through reports and echo seminars
 - Sending participants aside from the CCOP sponsored attendees
- Recommendations
 - Participation of more technical experts in the workshops
 - Application of technologies and strategies on the case studies

Attendance in EPPM Program

- Capacity building objectives
 - For natural gas case study, we can learn a lot from the experience of the gas producing countries
 - For cross border basin study, sharing of the data is essential
 - For the metadata, we have just started with this and do not have such system installed in our country

Thank you very much for your
attention
