Davao, The Philippines
Oct 7-9, 2009

- 1** CCOP Metadata Standard of Geoinformation
- 2** Software development
- 3** Benefits and way forward

1 CCOP Metadata Standard

based on ISO19115 and CGS DD2006-05

2006

CCOP-CGS-GSJ/AIST

Seminar on Geoinformation Technology and 4th Workshop of CCOP Metadata Working Group
(September 5-7, 2006, Guangzhou, China)

Guangzhou, China 2006

- CCOP Metadata working group workshop in 2006

Pic. By Marivic

Summary on 28-item standard

Requirement Analysis for an entire coverage metadata standard

Advanced IT application and products for geological survey and exploration

CCOP metadata project phase II

2007

CGS submitted a proposal to support phase II CCOP metadata standard work and was approved in 43rd annual meeting at Daejeon, Korea, 2006.

English version of Chinese *Geo-information Metadata Standard* sent to most of the CCOP member countries as reference.

CGS launched a project early 2007 to fund CCOP metadata phase II

Table 1 Metadata Information (MD Metadata)

| No. | Section/Entry | English Name | Identifia | Defin | Obligato | Minimum | Type | Dever |
|--------|---------------|-------------------------|-------------------|---|-----------|---------|--------|------------------------------------|
| 1.1.0 | MD Metadata | MD Metadata | Metadata | Root entity which defines metadata about dataset or data resources | M | 1 | Class | 1.1.1-1.1.11 |
| 1.1.1 | | metadataTitle | mdTitle | Name of metadata | O | 1 | String | FreeText |
| 1.1.2 | | mdCreateDate | mdCreateDate | Date that the metadata was created | M | 1 | Date | CCYMMDD (GB/T 14043-1996) |
| 1.1.3 | | mdLang | mdLang | Language used for documenting metadata | O | N | String | "Chinese", "English", "FreeText" |
| 1.1.4 | | characterSet | mdChar | Full name of the character coding standard used for the metadata set | O | 1 | Class | MD_CharacterSetCode (CodeList A.1) |
| 1.1.5 | | metadataStandardName | mdStandardName | Name of the metadata standard (including profile name) used | O | 1 | String | FreeText |
| 1.1.6 | | metadataStandardVersion | mdStandardVersion | Version (profile) of the metadata standard used | O | 1 | String | FreeText |
| 1.1.7 | | Contact | mdContact | Party/person responsible for the metadata information | M | N | Class | CI_ResponsibilityParty |
| 1.1.8 | | identificationInfo | mdIdent | Basic information about the resource(s) to which the metadata applies | M | 1 | Class | MD_Identification |
| 1.1.9 | | dataQualityInfo | mdDQ | Provides overall assessment of quality of a resource(s) | M | 1 | Class | DQ_DataQuality |
| 1.1.10 | | referenceSystemInfo | mdRS | Description of the spatial and temporal reference systems used in the dataset | O/Spatial | 1 | Class | RS_ReferenceSystem |
| 1.1.11 | | contentInfo | mdContent | Provides information about the feature entities and describes the coverage and image data characteristics | M | N | Class | MD_ContentDescription |
| 1.1.12 | | distributionInfo | mdDist | Provides information about the distributor of and options for obtaining the resource(s) | O | 1 | Class | MD_Distribution |

2009

CCOP Metada Standard
Version 2 final

3 CCOP Metadata Standard

- Including 5 packages (4 sections + 1 common class) and 7 code lists.
- 35 +10 elements in total, with 15 mandatory.
- Issued in 2008 by CCOP Metadata Working Group
- On the basis of ISO19115 and CGS Standard DD2006-05
- Covering the whole metadata contents of the former 28- item Standard and *Dublin Core*
- Applicable to the publication and interchange of spatial and non-spatial geological information covering geological maps, minerals, groundwater, geo-hazard, oil and gas, coal, geothermal, coastal zone, geophysics, geochemistry, drilling, geo-archives, etc.

CCOP GEOINFORMATION METADATA STANDARD

Edition 2 published in Sep.2009

1 SCOPE

2 TERMS AND DEFINITIONS

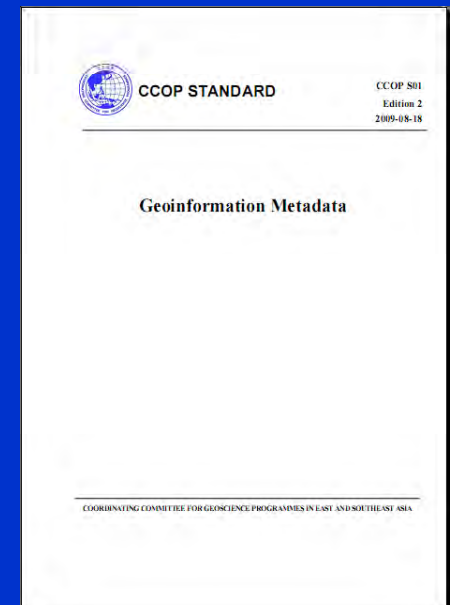

- Dataset
- Metadata
- Metadata element
- Metadata section

3 METADATA STRUCTURE AND CONTENT

- Metadata structure
- Metadata contents
- Data Dictionary

DATA DICTIONARY : 5 TABLES

ANNEX : 7 CODELISTS

1 SCOPE

- This standard has defined the schema required for description of geoinformation and provides information about the identification, quality, contents, spatial reference information, and the distribution of geological information.
- This standard is applicable to the description, dataset information publication, and network interchanges of the geological datasets dominated by various spatial data and the non-spatial information datasets and can also be referenced in the metadata collection and the metadata database construction.

2 TERMS AND DEFINITIONS

A. Dataset

Identifiable collection of data.

Collection of data can be either a database or a part of the database.

B. Metadata

Data about data.

They describe the related information about the data, including the contents, coverages, quality, status, management, owner, and the distribution.

C. Metadata element

Discrete unit of metadata.

Metadata elements are collected and described in tables called metadata dictionary.

D. Metadata section

Set of metadata elements describing the same aspect of a dataset.

Metadata section can be either a single section or an aggregation of one or more sections and elements.

3 METADATA STRUCTURE AND CONTENT

A. Metadata structure

Fig.1 describes the structure of geoinformation metadata.

Geoinformation metadata comprises of 4 sections:

- One mandatory section
- Two optional sections
- A common class named ResponsibleParty.

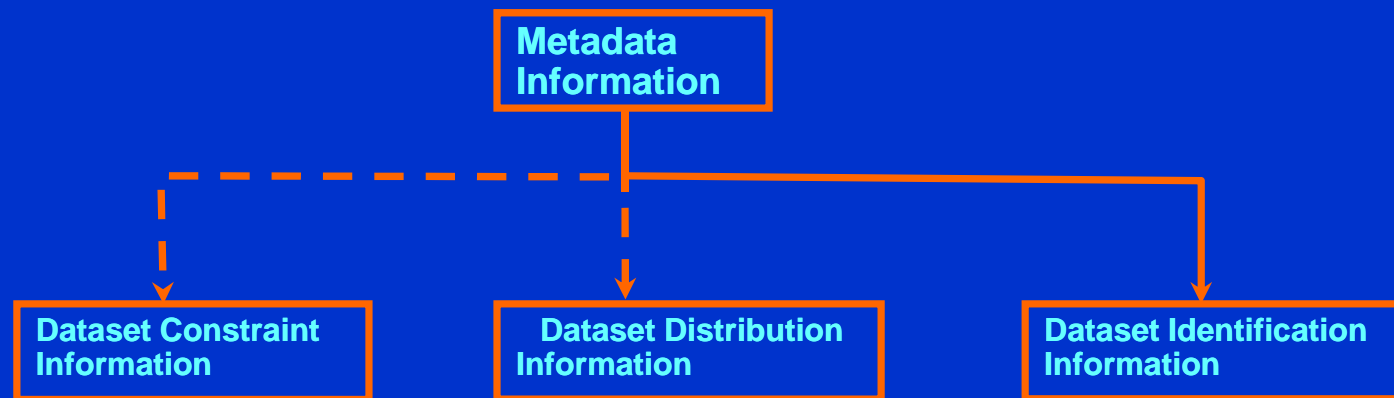

Fig.1 The structure diagram of geoinformation metadata

3 METADATA STRUCTURE AND CONTENT

B. Metadata contents

- Metadata Information

Metadata information section describes the whole metadata information of geoinformation, and is represented by the mandatory section MD_Metadata. It comprises of the following metadata sections and elements: Mandatory section, Optional section, Mandatory elements, Optional elements

- Dataset Identification Information

Identification information is the basal one of geo-dataset, and is represented by MD_Identification section which is a mandatory section.

- Dataset Constraint Information

Constraint Information describing general limitation for access and restrictions on using the dataset. It is an optional section.

- Dataset Distribution Information

Dataset distribution information describing dataset distributor and data-obtaining method. It is an optional section.

CCOP Geoinformation Metadata Standard *Sections and Elements*

| Section | Total | Mandatory | Conditional | Optional |
|--|--------------|------------------|--------------------|-----------------|
| Metadata information (MD_Metadata) | 6 | 2+1 | | 3 |
| Dataset identification information (MD_Identification) | 23 | 7 | 9 | 7 |
| Dataset constraint Information (MD_Constraint) | 2 | 1 | | 1 |
| Dataset distribution Information (MD_Distribution) | 4 | 3 | | 1 |
| <i>Responsible Party and Contact Information</i> (ResponsibleParty) | 10 | 1 | | 9 |
| SUM | 45 | 15 | | |

○ Metadata Information

It describes the whole metadata information of geoinformation, and comprises of the following sections and elements:

Mandatory section

MD_ Identification

Optional section

RS_Constraint

MD_Distribution

Mandatory elements

metadataTitle

metadataStamp

Optional elements

contact(refer to a common class *ResponsibleParty*)

○ Dataset Identification Information

It's the basal one of geo-dataset, and is represented by MD_Identification. It is an aggregation of the following elements:

Mandatory elements:

title

dateRelease

language

abstract

dataRepresentationType

7 Ms

topicCategory

pointOfcontact

Conditional elements:

keyWords

spatialResolution

eastBoundLongitude

westBoundLongitude

southBoundLongitude

northBoundLongitude

geographicIdentification

browseGraphic

coordinateSystemType

referenceSystemName

10 Cs

Optional elements:

edition

seriesName

characterSet

projection

4 Os

■ Dataset Constraint Information

It describes general limitation for access and restrictions on using the dataset. It is an optional section.

Mandatory elements:

useConstraint

Optional elements:

accessConstraint

■ Dataset Distribution Information

It describes dataset distributor and data-obtaining method.

Mandatory elements:

`distributorContact`

`mediaName`

`dataFormatName`

Optional element:

`onlineSource`

3 METADATA STRUCTURE AND CONTENT

- **Data Dictionary**

- Element and section names

Element name is the sole marker of metadata element.

- Short names

Except for the codelists, each metadata element has a unique short name in the entire standard.

- Definitions

Definition offers accurate description of metadata entities and metadata elements.

- Obligation/Condition

This is a descriptor indicating whether a metadata section or metadata element shall always be documented in the metadata or sometimes be documented (i.e. contains value(s)). This descriptor may have the following values: **M (mandatory)**, **C (conditional)**, or **O (optional)**.

Mandatory (M): It defines the metadata section or metadata element that should be documented. The optional sections may have the mandatory elements; these elements only become mandatory if the optional sections are used.

Conditional (C): It defines the conditions whether or not the metadata section/element is documented. When the condition is met, the section/element becomes mandatory.

Optional (O): The metadata section or the metadata element may be documented or may not be documented. If an optional section is not used, all the elements contained within that section (including mandatory elements) will also not be used. Optional sections may have mandatory elements; those elements only become mandatory if the optional section is used.

- Maximum occurrence

It specifies the maximum number of instances the metadata section or the metadata element may have. Single occurrence is shown by “1”; repeating occurrences are represented by “N”.

- Data type

It specifies a set of distinct values for representing the metadata elements. It may be basal data type or the section called class, stereotype, and associations.

- Domain

For a metadata section, the domain indicates the line numbers (the serial numbers of the tables in metadata dictionary) covered by that section. For a metadata element, the domain specifies the values allowed, the section or class names, the code list names, data type names, or the use of free text.

DATA DICTIONARY : 5 TABLES

- Table 1 to 5 have offered a data dictionary that describes the details of geoinformation metadata sections, classes and elements with names, short names, definitions, obligation/condition, maximum occurrence, types and domain.
- They together with the metadata codelists in Annex have comprised of a complete definition of geoinformation metadata of CCOP.

Data dictionary tables

Table 2

Table 2. Dataset identification information (MD_Identification)

| No. | Section | Element name | Short Name | Definition | Obligation/ Condition | Maximum occurrence | Type | Domain |
|------|---------|---------------------------------|-------------------|--|--|-----------------------|-----------|---|
| 2.13 | | <u>pointOfContact</u> | <u>idPoC</u> | A person or party related with the dataset | M | N | Class | <u>ResponsibleParty</u> |
| 2.14 | | <u>westBoundLongitude</u> | <u>westBL</u> | Western-most coordinate of the limit of the dataset extent, expressed in longitude in decimal degrees (positive east) | C/neither <u>browseGraphic</u> nor <u>geographicIdentification</u> is documented | 1 | Real Type | Decimal, degree -180.0 <= <= West Bounding Longitude Value <= 180.0 |
| 2.15 | | <u>eastBoundLongitude</u> | <u>eastBL</u> | Eastern-most coordinate of the limit of the dataset extent, expressed in longitude in decimal degrees (positive east) | C/ <u>westBoundLongitude</u> is documented | 1 | Real Type | Decimal, degree -180.0 <= East Bounding Longitude Value <= 180.0 |
| 2.16 | | <u>southBoundLatitude</u> | <u>southBL</u> | Southern-most coordinate of the limit of the dataset extent, expressed in latitude in decimal degrees (positive north) | C/ <u>westBoundLongitude</u> is documented | 1 | Real Type | Decimal, degree -90,0 <= South Bounding Latitude Value <= 90,0; South Bounding Latitude Value <=North bounding Latitude Value |
| 2.17 | | <u>northBoundLatitude</u> | <u>northBL</u> | Northern-most, coordinate of the limit of the dataset extent, expressed in latitude in decimal degrees (positive north) | C/ <u>westBoundLongitude</u> is documented | 1 | Real Type | Decimal, degree -90,0 <= North Bounding Latitude Value <= 90,0; North Bounding Latitude Value >=South Bounding Latitude Value |
| 2.18 | | <u>geographicIdentification</u> | <u>geoId</u> | Spatial location of a dataset. Describe the conventional or well-known geographic names/scopes of spatial scopes of a dataset, including place names, map sheet names, and their serial numbers. | C/ <u>browseGraphic</u> is not documented | N | String | Free text |
| 2.19 | | <u>browseGraphic</u> | <u>browGraph</u> | The browsing map or index map name of a dataset | C/ <u>geographicIdentification</u> is not documented | 1 | String | Free Text |
| 2.20 | | <u>referenceSystemName</u> | <u>refSysName</u> | Name of spatial reference system based on geographic identifier | C/spatial dataset is documented | 1 | String | Free Text |

Table 3 and 4

Table 3. Dataset constraint Information (MD_Constraint)

| No. | Section | Element name | Short name | Definition | Obligation/ Condition | Maximum occurrence | Type | Domain |
|-----|----------------|-------------------------|---------------------|--|--------------------------|-----------------------|-------|---|
| 3 | MD_Constraints | | <u>Consts</u> | Restriction on the access and use of a resource or metadata | O | N | | 3.1-3.2 |
| 3.1 | | <u>accessConstraint</u> | <u>accessConsts</u> | Assure the protection of privacy or intellectual property, and any special restrictions or limitations on obtaining the resource or metadata | O | N | Class | <u>RestrictionCode(CodeList)</u> A.5 |
| 3.2 | | <u>useConstraint</u> | <u>useConsts</u> | Assure the protection of privacy or intellectual property, and any special restrictions or limitations or warnings on using the resource or metadata | M | N | Class | <u>RestrictionCode(CodeList)</u> A.5 |

Table 4. Dataset distribution information (MD_Distribution)

| No. | Section | Element name | Short name | Definition | Obligation/ Condition | Maximum occurrence | Type | Domain |
|-----|-----------------|---------------------------|-------------------|---|--------------------------|-----------------------|--------|--|
| 4 | MD_Distribution | | <u>Consts</u> | Restriction on the access and use of a resource or metadata | O | N | | 4.1-4.4 |
| 4.1 | | <u>onlineResource</u> | <u>onLineSrc</u> | Information about online resources from which the resource can be obtained; addresses that offer online access in the model of URL address. | O | N | Class | URL (IETF RFC1738 IETF RFC2056) |
| 4.2 | | <u>distributorContact</u> | <u>distorCont</u> | Distributor of geological information dataset or data resources | M | N | Class | <u>ResponsibleParty</u> |
| 4.3 | | <u>mediaName</u> | <u>medName</u> | Medium name of dataset offered by the distributor | M | 1 | Class | <u>MediumNameCode</u> (CodeList)A.7 |
| 4.4 | | <u>dataFormatName</u> | <u>fomatName</u> | Name and version of data transfer format(s) offered by the dataset distributor | M | 1 | String | Free Text |

Table 5

Table 5. Responsible Party and Contact Information (ResponsibleParty)

| No. | Common Class | Element name | Short name | Definition | Obligation/Condition | Maximum occurrence | Type | Domain |
|------|-------------------------|------------------------------|---------------------|---|---|--|--------|---------------------------------|
| 5 | <u>ResponsibleParty</u> | | <u>RespParty</u> | Information about the person(s) and organizations associated with the dataset | Use obligation or condition from the referencing object | Use maximum occurrence from the referencing object | | 5.1-5.10 |
| 5.1 | | <u>individuName</u> | <u>rpIndName</u> | Name and title of the responsible person, separated by a delimiter | <u>C/ organisationName</u> not documented | 1 | String | Free Text |
| 5.2 | | <u>organisationName</u> | <u>rpOrgName</u> | Name of responsible party | <u>C/ individualName</u> not documented | 1 | String | Free Text |
| 5.3 | | <u>electronicMailAddress</u> | <u>eMailAddr</u> | Public address of the electronic mailbox of the responsible organization or individual | M | N | String | Free Text |
| 5.4 | | phone | <u>cntPhone</u> | Telephone numbers at which the organization or individual may be contacted | O | N | String | Free Text (use standard) |
| 5.5 | | <u>facsmile</u> | <u>cntFaxNum</u> | Fax numbers at which the organization or individual may be contacted | O | 1 | String | Free Text |
| 5.6 | | <u>deliveryPoint</u> | <u>cntDelPnt</u> | Detail physical address at which the organization or individual may be contacted, including road name and room number | O | 1 | String | Free Text |
| 5.7 | | city | city | city of the location (city name, county name) | O | 1 | String | Free Text |
| 5.8 | | country | country | Country of the responsible party | O | 1 | Class | Free Text (use standard) |
| 5.9 | | <u>postCode</u> | <u>postCode</u> | ZIP or other postal code | O | 1 | String | Free Text |
| 5.10 | | <u>onlineResource</u> | <u>cntOnlineRes</u> | On-line information that can be used to contact the individual or organization | O | 1 | String | URL (IETF RFC1738 IETF RFC2056) |

Annex: Geoinformation Metadata CodeList

A1 and A2

A.1 LanguageCode (based on ISO639. 2)

| No. | English Names | Code | Definition |
|-----|---------------------|----------------|---|
| | <u>LanguageCode</u> | <u>LanguCd</u> | Name of the language used in one or more of CCOP member countries |
| 1 | KHM | 001 | Khmer (in Cambodia) |

A.2 CharacterSetCode

| No. | English Names | Code | Definition |
|-----|-------------------------|------------------|---|
| | <u>CharacterSetCode</u> | <u>CharSetCd</u> | Character coding standard |
| 1 | UTF8 | 004 | 8-bit variable size UCS Transfer Format, based on ISO/IEC 10646 |
| 2 | ISO-8859-1 | 006 | GB/T 15273.1-1994 Information Process 8-bit single byte coded graphic character sets --Part 1: Latin alphabet No. 1 |
| 3 | <u>usASCII</u> | 025 | United States ASCII code set (ISO 646 US) |
| 4 | BIG5 | 028 | Traditional Chinese code set used in Taiwan, Hong Kong of China and other areas |
| 5 | GB2312 | 029 | Simplified Chinese code set |
| 6 | Windows-874 | | Thai character set encoding for Windows (a standard should not be bounded with particular software.) |
| 7 | TIS 620 | 030 | Thai Industrial Standards ,8-bits character set, a subset of ISO-IR-166, declared by Thai Industrial Standards Institute (TISI) |
| 8 | ISO-8859-11 | 016 | ISO/IEC8859-11 Information Process 8-bit single byte coded graphic character sets --Part 11: Latin alphabet /Thai character |
| 9 | <u>euckR</u> | 027 | Korean character set |
| 10 | TCVN3-ABC | | 8 bit character code set (Vietnam) |
| 11 | TCVN 6909:2001 | | Unicode font (Vietnam) |
| 12 | <u>eucJP</u> | 024 | Japanese code set used on UNIX based machine (TBC) |
| 13 | <u>shiftJIS</u> | 023 | Japanese code set used on MS-DOS based machine (TBC) |
| 14 | others | | Other characters not defined above |

A3

A.3 MD_RepresentationTypeCode

| No. | English Names | Code | Definition |
|-----|-------------------------------|-------------------|---|
| | <u>RepresentationTypeCode</u> | <u>RepTypCode</u> | Types of spatial data |
| 1 | vector | 001 | Vector data is used to represent geographic data |
| 2 | grid | 002 | Grid data is used to represent geographic data |
| 3 | text | 003 | Textual data is used to represent geographic data |
| 4 | TIN | 004 | Use triangulated irregular network to represent geographic data |
| 5 | <u>stereomodel</u> | 005 | Multidimensional representation of data |
| 6 | video | 006 | Represent data in video |
| 7 | matrix | 007 | Matrix data |
| 8 | table | 008 | Tabular data is used to represent geographic data |
| 9 | Raster | 009 | Scanned and digital images |
| 10 | Others | 010 | Other types not defined above |

A4

6 1st Category Names
 31 2nd Category Names
 72 3rd Category Names defined

| No. | 1st Category Name | 2nd Category Name | Definition and illustration | code |
|-----|-------------------|-------------------|--|-----------------------------|
| 1 | Geography | | The study of the Earth and its lands, features | 1000 |
| | | | Geochemistry Geochemistry includes isotope geochemistry, biogeochemistry, organic geochemistry, regional, environmental and exploration geochemistry, such as rock geochemical exploration, soil geochemical exploration, stream sediment geochemical exploration, atmospheric geochemical exploration, biogeochemical exploration, water geochemical exploration, geo-gas survey, chemical analysis, geochemical mapping, geothermal manifestation, radiometric dating, etc. | 2500 |
| 2 | Geology | | Geological exploration Geology on searching or discovery of geo-resources, such as minerals, oil & gas, etc. It includes mineral exploration, ore geology, ocean geoexploration, mineral economics, and so on. | 2600 |
| | | | Exploration and mining administration Regulations, law and relative activities and documents on geological exploration and mining. | 2700 |
| | | | Oil and Gas It includes petroleum geology, oil and gas exploration, exploitation or production, oil and gas field, etc. | 4300 |
| 3 | | | Coalbed methane It includes coalbed methane geology, coalbed methane exploration, coalbed methane production, etc. | 4400 |
| | | | Gas hydrate It includes both natural and experimental gas hydrate, gas hydrate geology, gas hydrate exploration, gas hydrate exploitation, etc. | 4500 |
| | | | Coal It include coal geology, coal exploration, coal production, etc. | 4600 |
| | | | Oil shale It include oil shale geology, oil shale exploration, oil shale production, etc. | 4700 |
| | | | Geothermal It is related to energy and may refer to heat that comes from within the Earth. It includes geothermal geology, geothermal exploration, geothermal exploitation, geothermal tourism, etc. | 4800 |
| 5 | Geo-Literature | | Literatures of and about geology | 5000 |
| | | | Geological publications Publications of geology, such as books, periodicals, magazines, etc. | 5100 |
| | | | Geological Archives Geological reports and written materials that mostly are not published | 5200 |
| 4 | | | Geopark It includes activities, databases, books and other materials about Geopark. A geopark is defined by UNESCO as a territory encompassing one or more sites of scientific importance, not only for geological reasons but also by virtue of its archaeological, ecological or cultural value. | 5600 |
| | | 6 | Others | Can not be classified above |

A5 and A6

A.5 RestrictionCode

| No. | English Names | Code | Definition |
|-----|------------------------|----------|---|
| | <u>RestrictionCode</u> | Restrict | Limitation(s) placed upon the access or use of the data |
| 1 | copyright | 001 | Exclusive right to the publication, production, or sale of the rights to a literary, dramatic, musical, or artistic work, or to the use of a commercial print or label, granted by law for a specified period of time to an author, composer, artist, distributor |
| 2 | patent | 002 | Government has granted exclusive right to make, sell, use or license an invention or discovery |
| 3 | <u>patentPending</u> | 003 | Produced or sold information awaiting a patent |
| 4 | trademark | 004 | A name, symbol, or other device identifying a product, officially registered and legally restricted to the use of the owner or manufacturer |
| 5 | license | 005 | Formal permission to do something |

A.6 CoordinateSystemTypeCode

| No. | English Names | Code | Definition |
|-----|---------------------------------|--------------------|--|
| | <u>CoordinateSystemTypeCode</u> | <u>CoorSysType</u> | |
| 1 | Cartesian | 001 | A n -dimensional (n stands for an arbitrary positive integer) coordinate system that consists of n number axes which perpendicularly cut each other at the origin |
| 2 | Geodetic | 002 | A spherical coordinates of a ground point location expressed in longitudinal and latitudinal degrees |
| 3 | Projected | 003 | Coordinate systems formed through different projection methods |
| 4 | Polar | 004 | A coordinate system that describes the location of a point through the distance between the point and the pole as well as the extensional direction |
| 5 | Gravity Related | 005 | A norm for gravity survey and related calculation |
| 6 | WGS 84 | 4326 | World wide GPS coordinate system. |

ation of non-tangible property

A.7 MediumNameCode

| No. | English Names | Code | Definition |
|-----|-----------------------------------|---------------------|--|
| | <u>MediumNameCode</u> | <u>MediumNameCd</u> | Name of the medium |
| 1 | <u>cdRom</u> | 001 | Read-only optical disk |
| 2 | <u>dvd</u> | 002 | Digital versatile disk, include rewritable disk |
| 3 | <u>dvdRom</u> | 003 | Digital versatile disk, read only |
| 4 | <u>3halfinchFloppy</u> | 004 | 3,5 inch magnetic disk |
| 5 | <u>7trackTape</u> | 006 | 7 track magnetic tape |
| 6 | <u>9trackTape</u> | 007 | 9 track magnetic tape |
| 7 | <u>3480CartridgeTape</u> | 008 | 3480 cartridge tape drive |
| 8 | <u>3490 CartridgeTape</u> | 009 | 3490 cartridge tape drive |
| 9 | <u>3590 CartridgeTape</u> | 010 | 3590 cartridge tape drive |
| 10 | <u>4mm CartridgeTape</u> | 011 | 4mm magnetic tape |
| 11 | <u>8mm CartridgeTape</u> | 012 | 8mm magnetic tape |
| 12 | <u>1quarterInch CartridgeTape</u> | 013 | 0.25 inch magnetic tape |
| 13 | <u>digitalLinearTape</u> | 014 | Half inch cartridge streaming tape drive |
| 14 | <u>onLine</u> | 015 | Direct computer linkage |
| 15 | Satellite | 016 | Linkage through a satellite communication system |
| 16 | <u>TelephoneLink</u> | 017 | Communication through a telephone network |
| 17 | hardcopy | 018 | Pamphlet or leaflet giving descriptive information |
| 18 | <u>harddisk</u> | 019 | Hard disk |
| 19 | <u>flashMemory</u> | 020 | Flash disk |
| 20 | <u>electronicMail</u> | 021 | Offering data in e-mail mode |
| 21 | <u>cdRewritable</u> | 022 | Rewritable optical disk |
| 22 | <u>blurayDisk</u> | 023 | High-definition optical disk |
| 23 | portable hard disk | 024 | Portable Computer hard disk |
| 24 | U-disc/flash disc | 025 | Memory disk of small size |
| 25 | <u>videoDigital</u> | 026 | Digital video recording |
| 26 | others | 099 | Medium not listed |

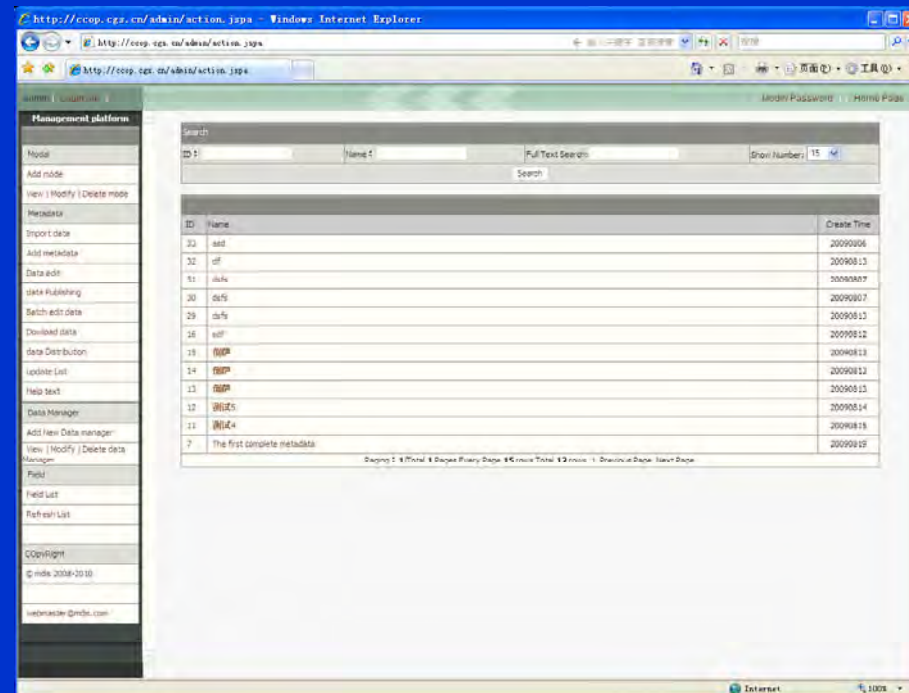

2 Software development

Web based software for metadata management is just finished this September.

It's now installed at CGS website for test/trial for a month by the developing group. <http://ccop.cgs.cn>

Metadata Import / upload

The screenshot shows a web browser window with the URL `http://ccop.cgs.cn/admin/action.jspa`. The page title is "admin [Login out]" and there is a "Modify" link in the top right. A left sidebar menu is titled "Management platform" and contains the following items: Modal, Add mode, View | Modify | Delete mode, Metadata, Import data, Add metadata, Data edit, data Publishing, Batch edit data, Download data, data Distribution, update List, Help text, Data Manager, Add New Data manager, View | Modify | Delete data Manager, Field, Field List, Refresh List, COpYRight, © mdis 2008-2010, and webmaster@mdis.com.

The main content area is titled "Import data" and contains a form with the following fields:

- Select Schema: Select
- Import Mode: File
- Import Number: Directory
- Select a file: [text input] 浏览...

Below the form are "submit" and "resets" buttons.

A "选择文件" (Select File) dialog box is open, showing the "download" folder. The file list includes:

- Mapinfo10
- server
- 紫光输入法
- GoogleEarthPluginSetup
- googleupdatesetup
- QQ2009Beta2
- server
- SPlayerSetup
- 专家信息打印

The dialog box also shows "我最近的文档", "桌面", "我的文档", "我的电脑", and "网上邻居" on the left. At the bottom, there are fields for "文件名(N):" and "文件类型(T):" (set to "所有文件 (*.*)"), along with "打开(O)" and "取消" buttons.

Next step

- 1 The Web based software **CCOP MDIS** will be deployed at CCOP T/S server next month for trial use.
- 2 Hand on training workshop **early next year**.
- 3 **Launch** Web-based application **Online metadata** collection and release management at CCOP T/S linked with member countries via Internet.

3 Benefits

- Geoinformation release nationwide and worldwide via internet

Metadata database for detail geoinformation release

Data title

Abstract

Quality

Constrains

Contact

.....

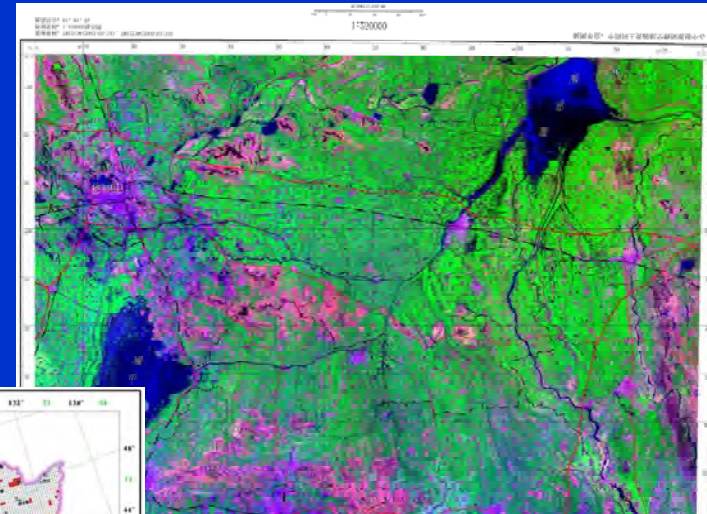

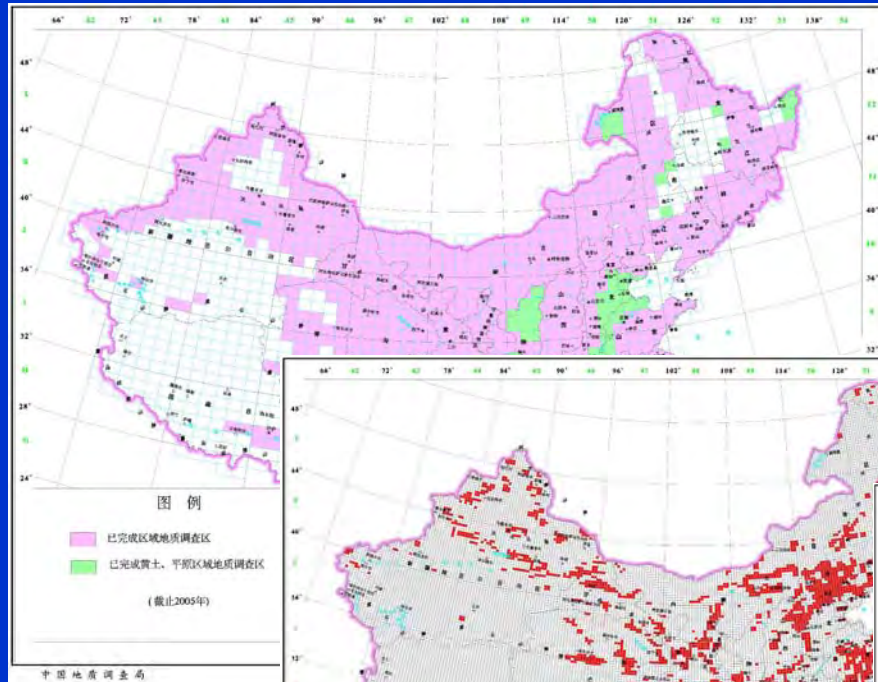

Tells *What, Who, Where, When, Why and How.....*

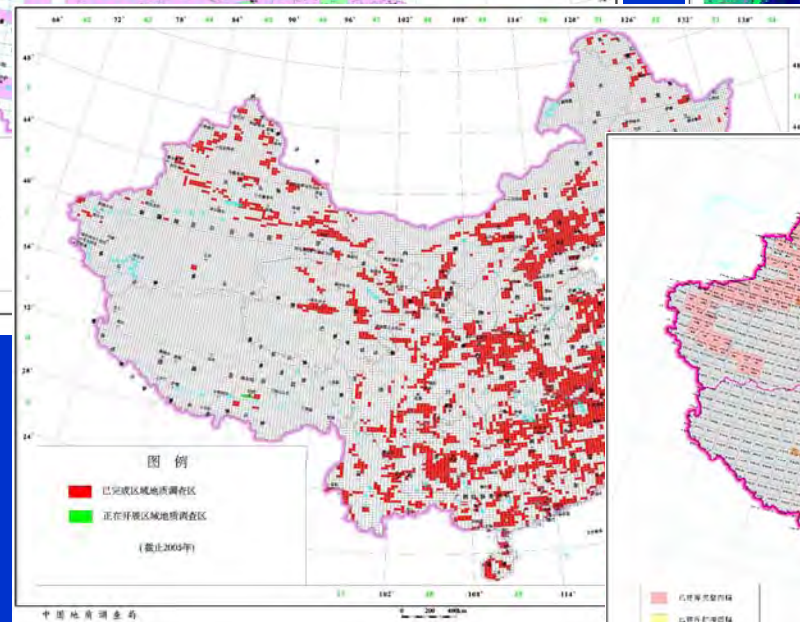

⊙ National benefit China for example

Remote sensing image metadata

1:200,000 regional geological map metadata

1:50,000 regional geological map metadata

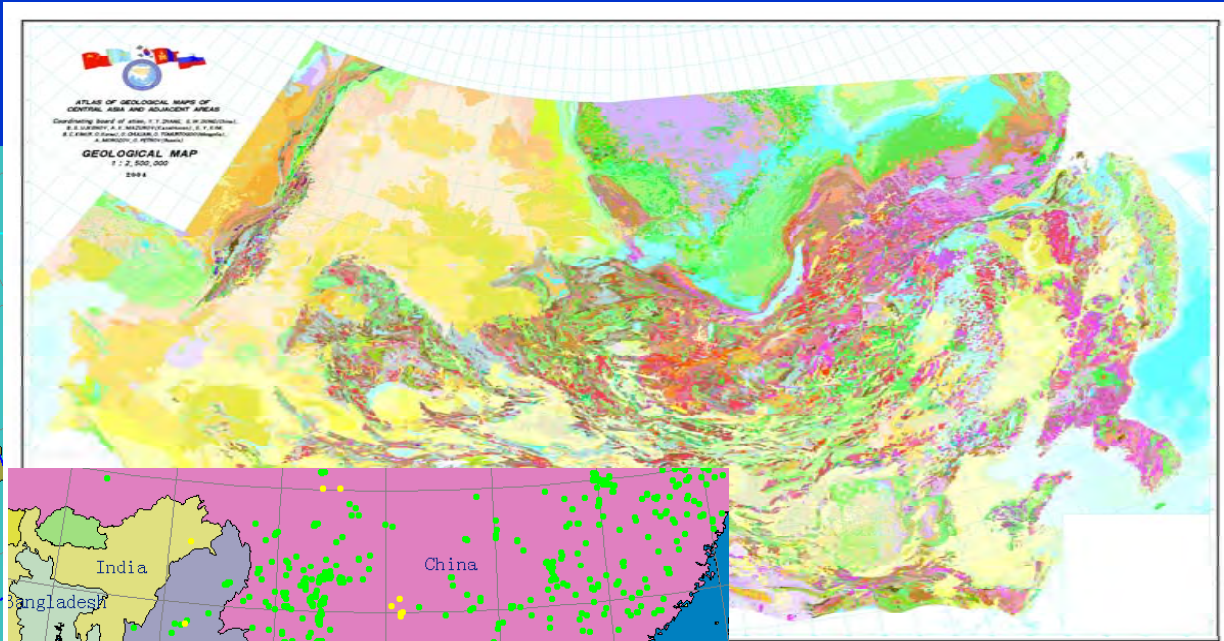

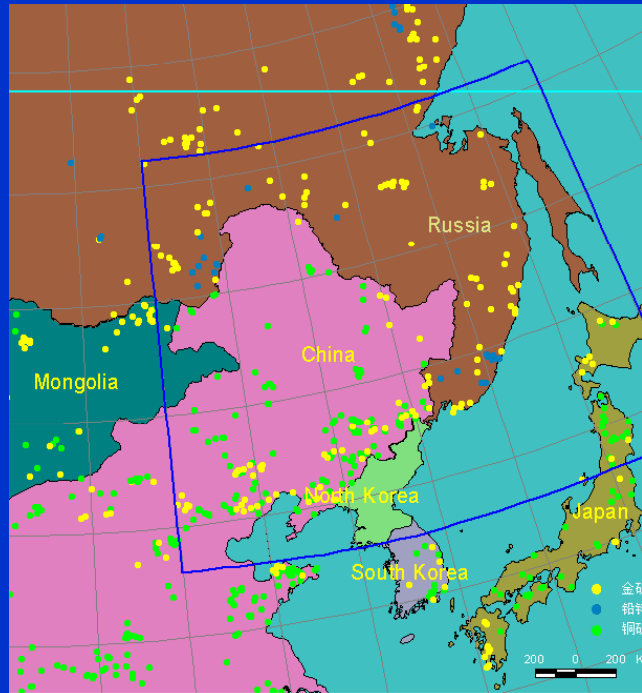

1:200,000 hydro-geological map metadata

International cooperation projects

Asia geological map

Globe mineral assessment

CGS adopt CCOP 28-item metadata standard as core metadata standard to release data Since 2003 for geological maps.

The screenshot shows the China Geological Survey website with several browser windows open. The main window displays the 'China Geological Survey' homepage with a navigation menu and a list of metadata entries. A table in the foreground shows the metadata for a specific dataset.

| | |
|-------------------------------------|--|
| Metadata file identifier | I4711 Tongde |
| Title in English Translation (Full) | I4711 Tongde Quadrangle of 1:200,000-scale Digital Geological Map Database |
| Edition | Published on Mar. 5, 2003. |
| Series name | Digital Geological Map 1:200,000 |
| Reference date | 20030305 |
| Responsible party organization name | Development Research Center, China Geological Survey |
| Postal address | No.45 Fuwai Street, Xicheng District |
| City | Beijing |
| Postal Code | 100037 |
| Country | CN |

The website also lists metadata for other databases, including the Heavy Mineral Database, National Isotopic Age of Rocks Database, and Regional Gravity Database.

✘ International benefit

Geoinformation sharing amongst *CCOP Member countries*.
CCOP Geoinformation sharing world wide...

Way forward for CCOP metadata project

- *Launching Web-based application next March at the end of Phase II project*
- *Hand on training on request to the member country by the CGS project group with CGS support.*
- *Web based metadata software system maintenance by the CGS group staff, and necessary extension making to the standard to meet the need of any other CCOP projects by the working group... and software upgrading and training which will be continually supported by the CGS group...*

THANK YOU !

Dr. Zhang Minghua
China Geological Survey
zminghua@mail.cgs.gov.cn

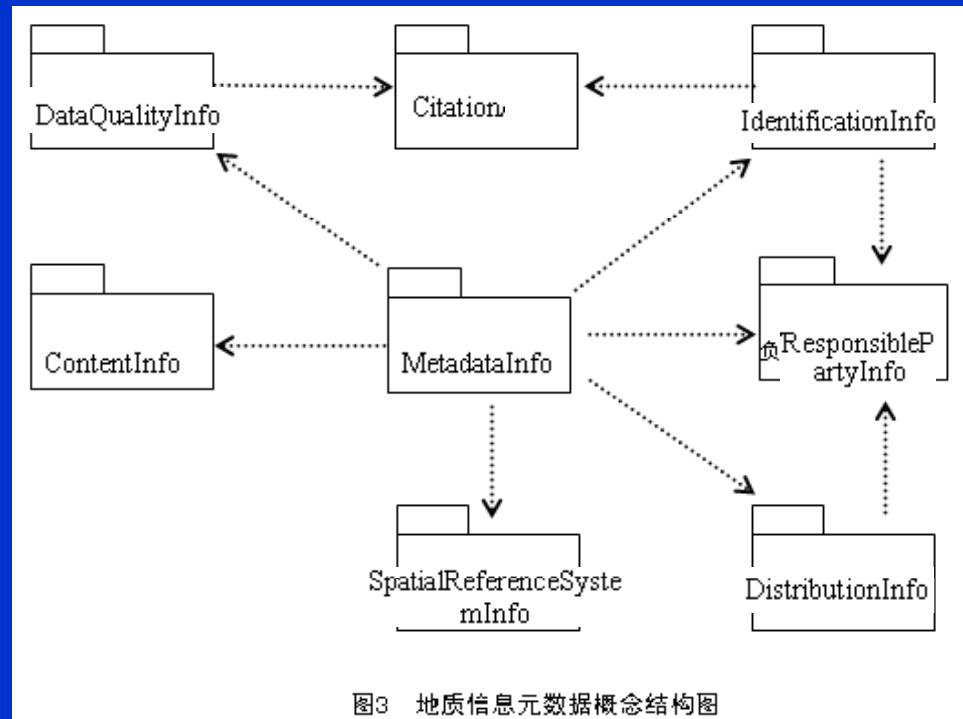

CGS issued and released *CGS Geoinformation Metadata Standard (DD2006-05)* in 2006

For geoinformation collection and release Since 2005.

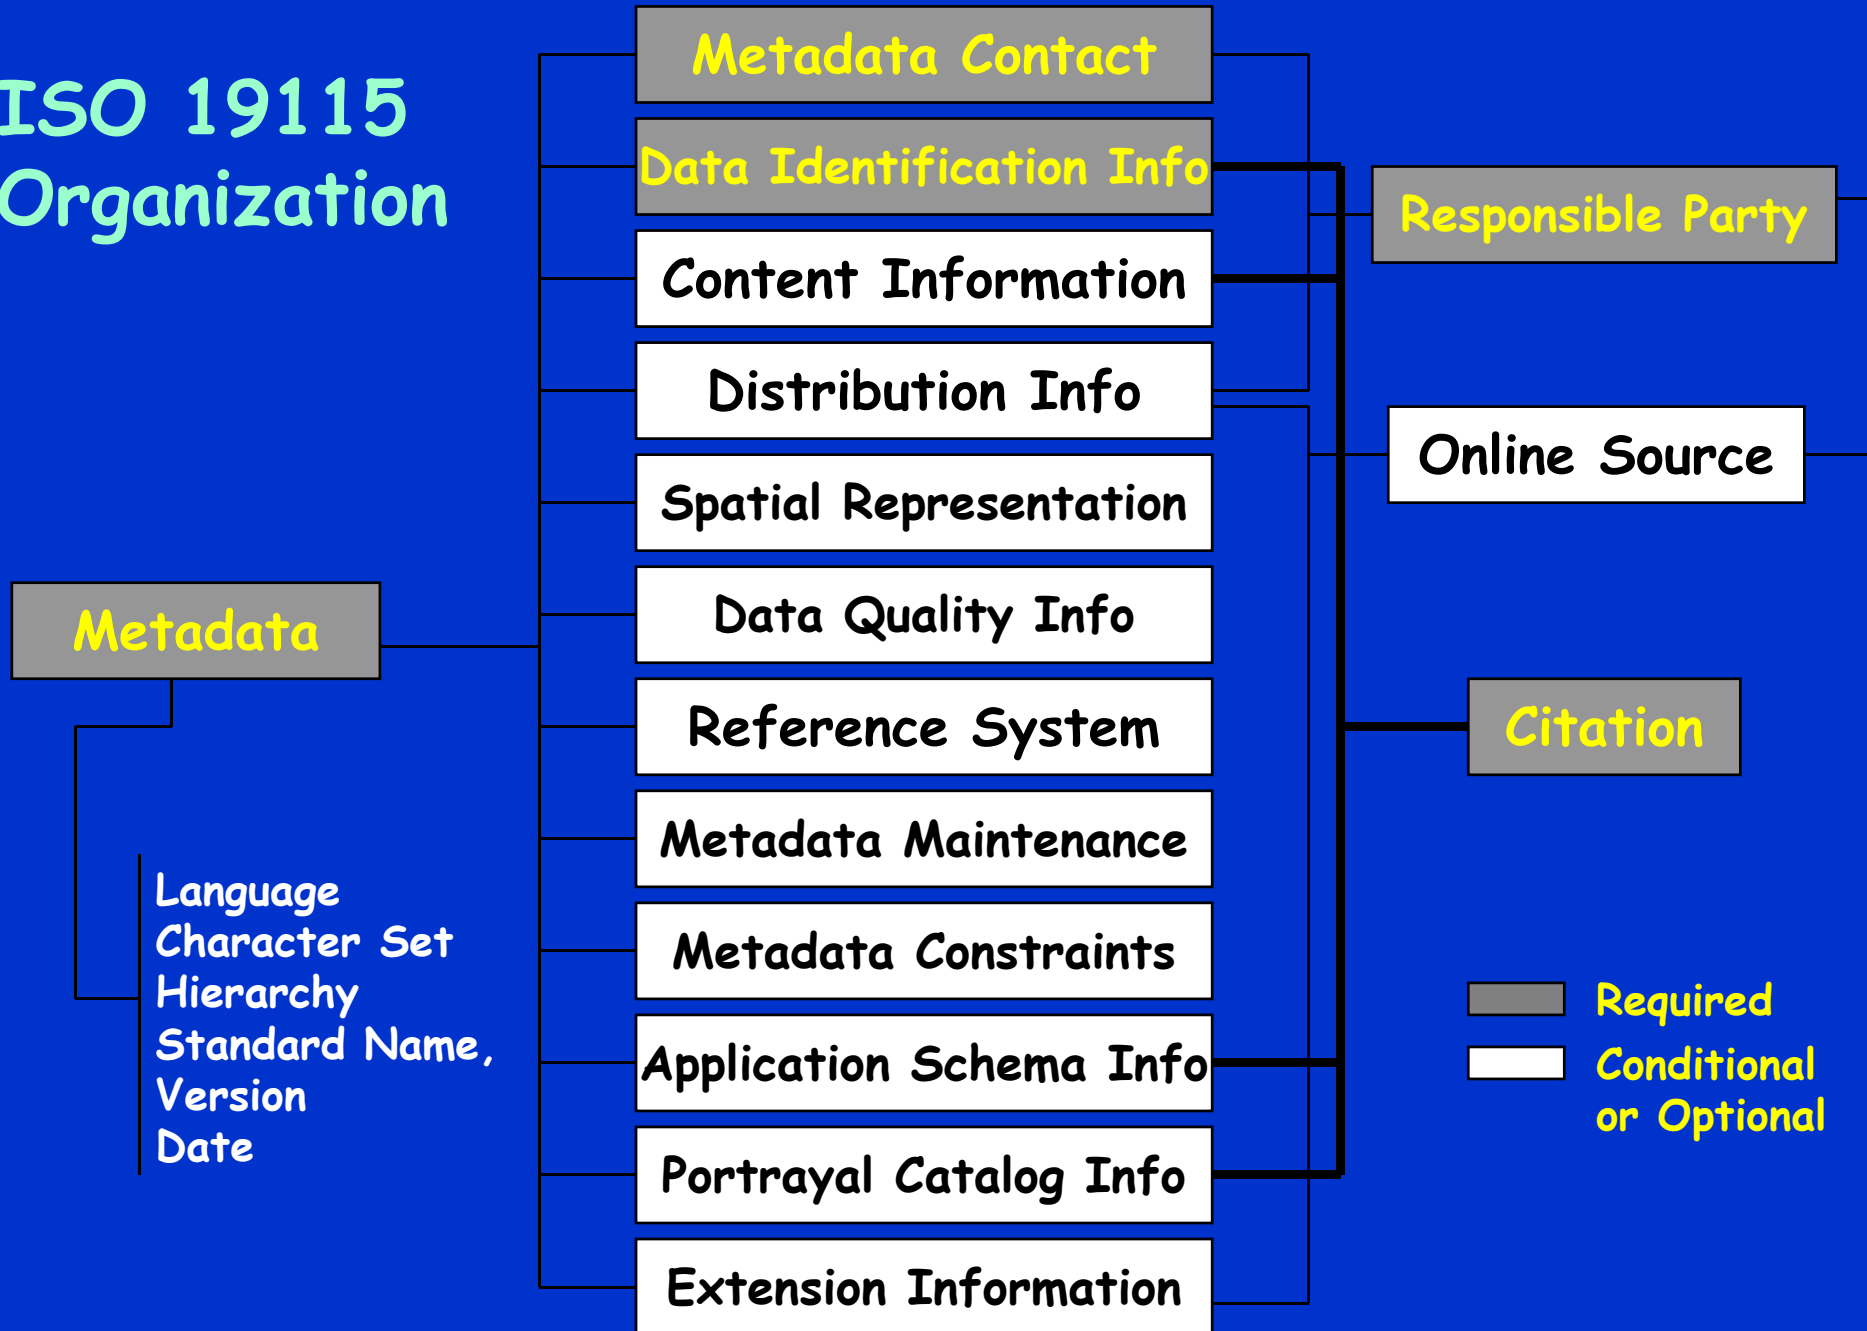

With coverage of

geological mapping, minerals, groundwater, geo-hazard, oil and gas, coal, geothermal, coastal zone, geophysics, geochemistry, drilling, geo-archives, etc.

8 entities
88 elements
(46 mandatory, 19 conditional)
1 annex.

ISO 19115 Organization

Table 3 — Core metadata for geographic datasets

| | |
|--|---|
| Dataset title (M) (MD_Metadata > MD_DataIdentification.citation > CI_Citation.title) | Spatial representation type (O) (MD_Metadata > MD_DataIdentification.spatialRepresentationType) |
| Dataset reference date (M) (MD_Metadata > MD_DataIdentification.citation > CI_Citation.date) | Reference system (O) (MD_Metadata > MD_ReferenceSystem) |
| Dataset responsible party (O) (MD_Metadata > MD_DataIdentification.pointOfContact > CI_ResponsibleParty) | Lineage (O) (MD_Me |
| Geographic location of the dataset (by four coordinates or by geographic identifier) (C) (MD_Metadata > MD_DataIdentification.extent > EX_Extent > EX_GeographicExtent > EX_GeographicBoundingBox or EX_GeographicDescription) | On-line (MD_Me MD_Digi |
| Dataset language (M) (MD_Metadata > MD_DataIdentification.language) | Metada (MD_Me |
| Dataset character set (C) (MD_Metadata > MD_DataIdentification.characterSet) | Metada (MD_Me |
| Dataset topic category (M) (MD_Metadata > MD_DataIdentification.topicCategory) | Metada (MD_Me |
| Spatial resolution of the dataset (O) (MD_Metadata > MD_DataIdentification.spatialResolution > MD_Resolution.equivalentScale or MD_Resolution.distance) | Metada (MD_Me |
| Abstract describing the dataset (M) (MD_Metadata > MD_DataIdentification.abstract) | Metadata character set (C) (MD_Metadata.characterSet) |
| Distribution format (O) (MD_Metadata > MD_Distribution > MD_Format.name and MD_Format.version) | Metadata point of contact (M) (MD_Metadata.contact > CI_ResponsibleParty) |
| Additional extent information for the dataset (vertical and temporal) (O) (MD_Metadata > MD_DataIdentification.extent > EX_Extent > EX_TemporalExtent or EX_VerticalExtent) | Metadata date stamp (M) (MD_Metadata.dateStamp) |
