  - Tax
  - Licensing

Users' Needs (cont.)

- Infrastructure
  - Facility
  - Transportation
 - Refineries

Users' Needs (cont.)

- Exploration Data
  - Seismic data
  - Well Information
  - Maps
  - Reports
  - Geological data
  - Petroleum system

How Metadata System Address the Needs?

▸ Select same categories and follow the international metadata standard (ISO 19115, dubline core, posc) then gather opinions / ideas based on each countries

▸ Make a simple and smart user friendly metadata to be a prototype or pilot

Should our metadata cover the whole spectrum of oil & gas business?

- Our metadata should cover many kinds of oil & gas business data but not deep in details
