EPPM Workshop Proper

Philippine Group

The Target Users

- Technical personnel (geoscientists and IT in the upstream sector)/Management sector within the organization (government)
- Service Contractors
- Prospective Foreign and Local Investors (i.e. oil companies)
- Policy makers, government agencies, CCOP, LGUs, other government and private sectors
- Academe
- NGOs

The Users' Needs

- Reports (i.e. well, geology, seismic)
- Raw and processed data
- Logs
- Figures
- Maps, charts, etc.
- Company Profile
- Statistical data (i.e. production, forecast, etc.)
- Economics and Fiscal matters (i.e. earnings, investments, CAPEX, OPEX, WP&B, etc.)

Advantages of the Metadata System

- Easy and fast access to information (right at your fingertips!)
- Systematic and centralized database
- Reference for decision-making (for management sector, policy makers, investors)
- Supports effective and efficient data and information management
- Additional income

Metadata Coverage

- Would include all sectors (upstream, midstream, downstream) as they are also the target users

MARAMING SALAMAT PO!
