

WS1 : User profile

Group of Cambodia + China + Vietnam + PNG

1. Identify the target user
 - people of E&P (1-st priority)
 - public user (investor, 2-scd priority)

2. User's Needs / benefits information about (resource data)
 - + basin information
 - + status of exploration & production
 - + legal information (Fiscal regimes, contract type)
 -

3. How would a Metadata address the needs of target user :
 - to be easy to access.
 - to be easy to search
 - easy load/update information into metadata system

4. The metadata system will coverage all spectrum of Oil & gas bussiness ? : long term => yes
 - Because of complicatedness of oil&gas bussines's information
 - Divide to several phase. Run way : phase by phase
 - Built metadata for :
 - E&P (upstream) - first priority
 - midstream(transport) & downstream after that
